

EPS CLOUD PROCESSING

Kourosh Tari

ENHANCED PAYMENT SYSTEMS

How to use EPS Gateway Cloud Processing:

Requirements:

1. PAX Android device (A80, A920, A60, A35)
2. EPS Link app from Pax store.
3. EPS Gateway active account
4. Valid API key.

API Calls:

- 1- Push Request
- 2- Pull Request (Happens in the EPS LINK app)
- 3- Push Response (performed by EPS LINK app)
- 4- Pull Response

Process Steps:

- 1- You push a transaction by using pushRequest to the EPS cloud
- 2- EPS LINK app on the device, awaiting transactions and pulls the requested transaction from the cloud
- 3- EPS LINK app processes the transaction on the device.
- 4- EPS LINK app pushes the results (Approved, or Declined) to the cloud
- 5- You pull the response from the cloud by calling pullResponse API.

1- pushRequest API call: Send your request to the EPS cloud.

Method: POST

Endpoint: <https://postransactions.com/connect/pushrequest.php>

POST /connect/pushrequest.php HTTP/1.1

Host: postransactions.com

apikey: 6d64aa72d8fa3cd2de55a766c08df5b1

Content-Type: application/json

Content-Length: 161

```
{  
  "account": "1502122693",  
  "amount": "0.04",  
  "device": "1350029286",  
  "ticketId": "18",  
  "transType": "creditsale",  
  "receiptId": "12122"  
}
```

Sample Response:

```
{  
  "success": true,  
  "status": "200",  
  "RecordId": 347,  
  "ReceiptId": "12122",  
  "message": "Payment Request Record Posted Successfully"  
}
```

This call adds your process request into the cloud.

2- pullRequest API call: EPS app uses this call to pull your processing request from the cloud.

Method: POST

Endpoint: <https://postransactions.com/connect/pullrequest>

POST /connect/pullrequest HTTP/1.1

Host: postransactions.com

apikey: 6d64aa72d8fa3cd2de55a766c08df5b1

Content-Type: application/json

Content-Length: 52

```
{  
  "account": "1502122693",  
  "device": "1350029286"  
}
```

Sample Response:

```
[  
  {  
    "success": true,  
    "status": "200",  
    "message": "1 records retrieved successfully",
```

```
"data": [  
  {  
    "id": 347,  
    "account": "1502122693",  
    "device": "1350029286",  
    "amount": 0.04,  
    "ticketId": "18",  
    "tableNo": null,  
    "tip": null,  
    "tax": null,  
    "fee": null,  
    "tipReq": null,  
    "transType": "creditsale",  
    "ptk": null,  
    "transactionId": null,  
    "token": null,  
    "userId": null,  
    "payDate": "2024-11-29 07:37:06",  
    "updated": "2024-11-29 07:37:06",  
    "status": "PENDING",  
    "firstName": null,  
    "lastName": null,  
    "zipcode": null,  
    "extraField1": null,  
    "extraField2": null,  
    "extraField3": null,  
    "receiptId": "12122",  
    "requestStr":  
      "sn=1350029286&amount=0.04&ticketid=18&account=1502122693&method=creditsale&token=&tipreq=0&ti  
p=&receiptid=12122"
```

```
}  
]  
}  
]
```

3- pushResponse API call: EPS app uses this API call to push the response

Method: POST

Endpoint: <https://postransactions.com/connect/pushresponse.php>

POST /connect/pushresponse.php HTTP/1.1

Host: postransactions.com

apikey: 6d64aa72d8fa3cd2de55a766c08df5b1

Content-Type: application/json

Content-Length: 87

```
{  
  "account": "1502122693",  
  "device": "1350029286",  
  "receiptId": "12"  
}
```

Sample Response:

```
{  
  "success": true,  
  "status": "200",  
  "account": "1502122693",  
  "device": "1350029286",  
  "ReceiptId": "12",  
  "PTK": null,  
  "message": "Update request succeeded"  
}
```

4- pullResponse API call: Use this API call to receive the transaction result (response) from EPS cloud.

Method: POST

Endpoint: <https://postransactions.com/connect/pushresponse.php>

POST /connect/pushresponse.php HTTP/1.1

Host: postransactions.com

apikey: 6d64aa72d8fa3cd2de55a766c08df5b1

Content-Type: application/json

Content-Length: 87

```
{  
  "account": "1502122693",  
  "device": "1350029286",  
  "receiptId": "12"  
}
```

Sample Response:

```
{  
  "TransactionResult": "false",  
  "PTK": "",  
  "ResponseCode": "1000107",  
  "ApprovedAmount": "0.00",  
  "TransactionID": "",  
  "AuthCode": "000000",  
  "Token": null,  
  "CardType": "",  
  "AccountNum": null,  
  "ExpDate": null,  
  "TicketID": "",  
  "ResponseMsg": "No record was found",  
}
```
